he develops a conceptual framework to enable practitioners, researchers, and policymakers to identify, understand, and address the stakeholder and management implications of M&A activity. This is applied to four case studies that make explicit how complex stakeholder relationships play out around M&A and how these power dynamics were managed with different balances. Useful for academics, researchers, managers, advisors, investors, analysts, and other stakeholders, this book highlights the need to understand the EPS implications and processes involved around M&A. A business innovation driven by the advancement of technology has dramatically changed the business landscape over recent years. Not only in advanced countries but also in emerging markets, it is expected that business innovation could help achieve economic inclusion, which has been a global initiative over the last decade, creating opportunities for all people to benefit from the economic development. These proceedings provide an outlet for discussing the importance of business innovation especially in emerging countries in helping to reach inclusive economies. The papers cover the subject areas: management accounting, finance, economics, and social sciences.

Managerial Accounting
Each government recognises that there is a potential loss of competitive advantage of its business sector if future economic growth strategies are not aligned with a low carbon future. Some multinational organizations recognize this imperative and the importance of aligning business activities to a more sophisticated and flexible environmental management system that also incorporates quality, safety, occupational health, and corporate ethics. An organization's environmental management system (EMS) has traditionally been designed to address legislative and regulatory requirements. It has now become a measure of an organization's attitude to balancing environmental, economic, cultural, and social needs of its trading communities. By using real-world case studies, this text positions EMS as a core and critical management tool and a key requirement for businesses to ensure long-term survival. It provides fundamental building blocks to implement an environmental management system and clearly illustrates how it can be positioned within an organization to deliver innovative products and services to compete in a low carbon economy. Environmental management in a low carbon economy will prepare students and professionals alike with the ability and understanding to implement an environmental management system, which in turn will aid organizations in facilitating their transition to operate in a low carbon economy.

**How to Get Published in the Best Management Journals**

In many public sector organizations, there has been little or no adoption of a proactive asset management strategy where an extensive property portfolio exists. This can result in poor overall utilization of the portfolio, exemplified by excessive vacant property or properties not being put to best use. In such situations, there is a risk that the building stock deteriorates more rapidly than expected, leading to expensive maintenance and repair charges. Lack of a proactive asset management strategy will impact on the services delivered by such organizations. Public sector property asset management covers all aspects of asset management in the public sector, including the overall concept, the development of asset management strategies, and the implementation of asset management practices. It evaluates asset management strategies, processes, and practices to show how effective management of property assets supports business activities or service delivery functions. The reader will understand the importance of improving decision making through the recognition of all costs of owning and operating those assets throughout their lifecycle, leading to improved business process activities or service delivery functions, which greatly assist in meeting the social and economic objectives of such organizations. Written for all practitioners currently involved in asset management, the book will also be useful in the university environment to those teaching, researching, or learning about asset management in the public sector.
the rapidly changing world requires constant revisions and adaptations to existing business strategies and models. The emerging Industry 5.0 reality is forcing companies to transition to a more sustainable, human-centric, and resilient industry through innovation.
