general walter krueger commanded the 6th army in the southwest pacific theater in world war ii as the commander 6th army he led the troops that liberated new guinea and the philippines and he was designated as the commander of the forces scheduled to invade japan krueger s wartime
accomplishments were simply a continuation of contributions made to the United States Army and Navy over a 47-year career yet despite his achievements after the war, Krueger simply faded away. Krueger’s lack of historical name recognition some 50 years after his greatest achievements deprives current officers and historians not only the knowledge of wartime exploits but also of significant understanding of the development of joint operations doctrine in the years between World War I and World War II. The current consensus among historians is that the United States Marine Corps was responsible for the development of amphibious operations while true at the tactical level, this paper demonstrates that the Army and Naval War Colleges and the Army and Navy General Staffs and War Plans Divisions were key players in the development of doctrine at the strategic and operational level.

General Walter Krueger attended both war colleges, served on the faculty of both war colleges, and served two tours in the Army War Plans Division, including a two-year stint as its chief. He was on the Joint Board or the Joint Planning Committee for over six years. The intent of this paper is to show Krueger’s personal influence in the development of joint doctrine. The paper considers Krueger’s assignment history, the war plans he developed, his ideas on unity of command and the need for inter-service understanding and his principles of war planning. It includes a case study of the Lingayen Gulf landing in January 1945 to demonstrate the acceptance and rejection of his key ideas. The paper focuses on Army and Navy issues and considers Air issues only tangentially.

The processes of assaying are detailed with great clearness. Popular Science Monthly, July 1883. It is just such a book as is needed to assist those who are by actual work developing the gold and silver mines of the country. Chicago Tribune, March 31, 1883. The author has faithfully endeavored to carry out his idea of a plain practical work no one will be a loser who possesses mining and scientific press, San Francisco, August 18, 1883. Has endeavored we may add with marked success to prepare a work on assaying. Engineering and Mining Journal, April 28, 1883. The book will form an excellent elementary guide to the important art of assaying. Chemical News, London, June 8, 1883. Mr. Brown has succeeded in providing a valuable assistant for the student, the miner, and the assayer. Mining Review, March 29, 1883. This handy volume appears to contain sufficient information in the art of assaying to entitle it to the claim of being a manual of instruction to beginners. Scientific American, July 14, 1883. There is probably no other book in the English language that so fully meets the wants of those for whom it was made as this manual. Journal of Education, Boston, September 25, 1884. It is a complete compendium of everything pertaining to the assaying of the above mentioned ores. Mining Record, April 7, 1883. Allow me as a miner to thank you for your manual it is written in English and for us and not for Freiberg men. Eugene Smith. My opinion is that for clearness, accuracy, and adaptation to the uses of an American assayer it is worth all the other assay books that I am acquainted with. H. O. Lang. Your book is plain and just the thing for beginners. E. W. Walter. I congratulate you upon this little book. I wish other
writers on metallurgical subjects would write in as plain english louis janin mining engineer

While the PP and PPK were intended for police work, the Walther P38 was produced for the German military. All three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP Polizeipistole, a double action semi-automatic pistol intended for the law enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin, the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931 intended to replace the P08 Luger. The Walther P38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P38 re-emerged as the P1 and equipped West German forces from 1963 until 2004 when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use, and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants such as the tiny 25 ACP Modell 9.
