fundamental concern towards securing a sustainable future this volume argues that despite various
domestic and international policies and legal frameworks on biodiversity conservation be it forest
wildlife marine coastal etc their implementation suffers from many deficiencies it explores the factors
that hinder effective implementation of these policies and frameworks it also analyses existing laws
both international and domestic to identify inherent problems in the existing legal system the book
maintains that careful adherence to established procedures and protocols public awareness filling
the lacuna in legal framework and a strong political will are sine qua non for effective conservation of
biodiversity and sustainable development the volume defends the protection of traditional
knowledge and participation of indigenous communities along with reinforcements of intellectual
property in this regard it also commends the role played by the indian judiciary especially the
supreme court of india and india s national green tribunal for the preservation and enhancement of
natural resources by applying established as also evolving principles of environmental law this book

war determines that the reasons for warfare have as much to do with domestic concerns as they do
with international threats with essays by defence scientists established and emerging scholars and
senior military officers from germany the united states and canada this volume includes debates on
whether the number of military fatalities is being reduced war’s changing character and the ways in
which the improvised explosive device has and will continue to challenge modern advanced
militaries deployed abroad especially in afghanistan and iraq a sophisticated exercise in foreign and
defence policy analysis going to war provides clear and vivid ideas on how to optimize future
western military interventions futures studies is a new field of inquiry involving systematic and
explicit thinking about alternative futures it aims to demystify the future make possibilities for the
future more known to us and increase human control over the future this book summarizes and
expands contributions of futurists to the envisioning power and well being of humanity bell brings
together futurist intellectual tools describing and explaining not only the methods but also the nature
concepts theories and exemplars of the field foundations of futures studies fulfills bell’s five main
purposes for writing this two volume effort 1 to show that futures studies like other fields from
anthropology to zoology exists as an identifiable sphere of intellectual activity 2 to create a teaching
instrument that can be used as a basic text for core courses in futures studies 3 to futurize the
thinking of specialists in other disciplines 4 to contribute to the further development and
improvement of futures studies and 5 to provide tools to empower both ordinary people and leaders
to act in ways that create better futures for themselves and their societies bell maintains that despite
its sometimes doomsday rhetorical style and widespread use by special interests futures studies
offers hope for the future of humanity and concrete ways of realizing that hope in the real world of
our everyday lives it will appeal to all interested in futures studies as well as sociologists economists
political scientists and historians an exploration of how the windy city became a postwar latinx
metropolis in the face of white resistance though chicago is often popularly defined by its polish
black and irish populations cook county is home to the third largest mexican american population in
the united states the story of mexican immigration and integration into the city is one of complex
political struggles deeply entwined with issues of housing and neighborhood control in making
mexican chicago mike amezcua explores how the windy city became a latinx metropolis in the
second half of the twentieth century in the decades after world war ii working class chicago
neighborhoods like pilsen and little village became sites of upheaval and renewal as mexican
americans attempted to build new communities in the face of white resistance that cast them as
perpetual aliens amezcua charts the diverse strategies used by mexican chicagoans to fight the
forces of segregation economic predation and gentrification focusing on how unlikely combinations
of social conservatism and real estate market savvy paved new paths for latinx assimilation making
mexican chicago offers a powerful multiracial history of chicago that sheds new light on the origins
and endurance of urban inequality innovative history of the popular magical imagination and
ordinary people’s experience of urbanization in nineteenth century england in the late 1950s against
the unfolding backdrop of the cold war american and european leaders began working to reshape
western europe focusing on the four largest atlantic powers britain france germany and the united
states giauque explores these early stages of european integration this volume is a collection of
essays from a diverse group of scholars collectively they present a multidimensional perspective of
globalization in southeast asia they delve into the political economic security social and cultural
dimensions of globalization and local responses offering evidence of complex interfacing between
the global and the local thus championing the need for a multidisciplinary approach to globalization
studies this volume depicts globalization as an uneven and sometimes undesired process and
resists the temptation for easy conclusions to the challenges facing the region today each issue
includes also final data for preceding month international criminal law is at a crucial point in its
history and development and the time is right for practitioners academics and students to take stock
of the lessons learnt from the past fifteen years as the international community moves towards an increasingly uni polar international criminal legal order with the international criminal court icc at the helm this unique research companion takes a critical approach to a wide variety of theoretical practical legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international criminal tribunals the book is divided into four main parts the first part analyses international crimes and modes of liability with a view to identifying areas which have been inconsistently or misguidedly interpreted overlooked to date or are likely to be increasingly significant in future the second part examines international criminal processes and procedures and here the authors discuss issues such as victim participation and the rights of the accused the third part is a discussion of complementarity and sentencing while the final part of the book looks at international criminal justice in context the authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law as international criminal law becomes more established as a distinct discipline it becomes imperative for international criminal scholarship to provide a degree of critical analysis both of individual legal issues and of the international criminal project as a whole this book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse this book aims to integrate the notions of contagion in epidemiology and contagion in financial market crises to discover why emerging markets are so susceptible to financial crises the author first provides a brief introduction of the contagious spill over of recent financial market crises and models the pattern of these crises he finds that the contagion between crises in emerging markets such as that of the crises in russia and brazil in 1998 1999 is explicable despite the fact that at first sight they appear to have little in common finally friedrich sell integrates these findings to outline a proposal for a new international financial architecture

much has been written on the how colonial subjects took up british and european ideas and turned them against empire when making claims to freedom and self determination the possibility of reverse influence has been largely overlooked insurgent empire shows how britain s enslaved and colonial subjects were not merely victims of empire and subsequent beneficiaries of its crises of conscience but also agents whose resistance both contributed to their own liberation and shaped british ideas about freedom and who could be free insurgent empire examines dissent over the
question of empire in Britain and shows how it was influenced by rebellions and resistance in the colonies from the West Indies and East Africa to Egypt and India. It also shows how a pivotal role in fomenting dissent was played by anti-colonial campaigners based in London at the heart of the empire.

Conservation of biodiversity is a fundamental concern towards securing a sustainable future. This volume argues that despite various domestic and international policies and legal frameworks on biodiversity conservation, be it forest, wildlife, marine, coastal, etc., their implementation suffers from many deficiencies. It explores the factors that hinder effective implementation of these policies and frameworks. It also analyses existing laws both international and domestic to identify inherent problems in the existing legal system. The book maintains that careful adherence to established procedures and protocols, public awareness, filling the lacuna in legal framework, and a strong political will are sine qua non for effective conservation of biodiversity and sustainable development. The volume defends the protection of traditional knowledge and participation of indigenous communities along with reinforcements of intellectual property in this regard. It also commends the role played by the Indian judiciary, especially the Supreme Court of India and India’s National Green Tribunal, for the preservation and enhancement of natural resources by applying established as also evolving principles of environmental law. This book will be useful to scholars and researchers of environmental studies, development studies, policy studies, and law related to biodiversity and conservation.

This book provides a comparative analysis of the social economic industrial and migration dynamics that structure women’s paid work and unpaid care work experience in the Asia Pacific region. Each country focused chapter examines the formal and informal ways in which work and care are managed. The changing institutional landscape, gender relations, and fertility concerns, employer and trade union responses, and the challenges policy makers face and the consequences of their decisions for working women by covering the entire region including Australia and New Zealand. The book highlights the way different national work and care regimes are linked through migration with wealthier countries looking to their poorer neighbours for alternative sources of labour. In addition, the book contributes to debates about the barriers to women’s participation in the workforce, the valuation of unpaid care, the gender wage gap, social protection, and labour regulation for migrant workers and gender relations in developing Asia.

The fascinating history of white solidarity with the black power movement in the mid 1960s as the politics of black self-determination gained steam. Black activists had a new message for white activists: go into your own communities and organize white people against racism. While much of the media at the time and many historians since have regarded this directive as a white purge from the black freedom movement, Say Burgin argues that it heralded a new strategy racially parallel organizing which people experimented with all over the country. Organizing your own shows that the black freedom movement never experienced a white purge and offers a new way of understanding black power’s relationship to white America. By focusing on Detroit from the mid 1960s through the mid 1970s, this volume illuminates a wide cross section of white activists who took direction from black-led groups like the northern student movement, the city wide citizens action committee, and the league of revolutionary black workers. Organizing your own draws on numerous oral histories and heretofore unseen archives to show that these white activists mobilized support for black self-determination in education, policing, employment, and labor unions. It was a trial and error effort that pushed white activists to grapple with tough questions which white people should they organize and...
how which black led groups should they take direction from and when did taking black direction become mere sycophancy the story of detroit s white fight for black power thus not only reveals a broader richer movement but it carries great insight into questions that remain relevant
