Rapid cure composites materials processing and manufacturing presents up-to-date information on the design criteria to formulate matrix systems for rapid curing. Emphasis is placed on the role different materials, resin compound, and fiber reinforcement play in developing fast curing composites. Assessment of current and novel manufacturing techniques for adapting fast curing processes, the comparison between conventional curing and rapid curing, and different applications in various industrial sectors, e.g., aerospace, automotive, renewables, and marine. The book will be an essential reference resource for academic and industrial researchers working in the field of composite materials processing and manufacturing.

Materials scientists and more polymer composites are widely used in several industries including aerospace, automobile, spray and coatings, and electronics due to their lightweight and superior mechanical properties. However, one of the dominant hurdles towards their growth in commercial industries is the long curing cycle and slow production. Comprehensively addresses the scientific and technological development of rapid cured epoxy composites. Covers in detail the chemistry, processing, structure, and performance of rapid cured epoxy composites. Provides detailed comparisons of how why rapid cure composites are different to conventional composites. Discusses the challenges of the existing technology and future trends.

1988 logical monism is the claim that there is a single correct logic the one true logic of our title the view has evident appeal as it reflects assumptions made in ordinary reasoning as well as in mathematics, the sciences, and the law in all these spheres we tend to believe that there are determinate facts about the validity of arguments despite its evident appeal, however logical monism must meet two challenges: the first is the challenge from logical pluralism according to which there is more than one correct logic the second challenge is to determine which form of logical monism is the correct one. One true logic is the first monograph to explicitly articulate a version of logical monism and defend it against the first challenge it provides a critical overview of the monism vs pluralism debate and argues for the former. It also responds to the second challenge by defending a particular monism based on a highly infinitary logic it breaks new ground on a number of fronts and unifies disparate discussions in the philosophical and logical literature in particular it generalises the Tarski-Sher criterion of logicality provides a novel defence of this generalisation offers a clear new argument for the logicality of
infinitary logic and replies to recent pluralist arguments
