The Southeastern Reporter 2012-09-17 in 1905 eight men from the california academy of sciences set sail from san francisco for a scientific collection expedition in the galapagos islands and by the time they were finished in 1906 they had completed one of the most important expeditions in the history of both evolutionary and conservation science these scientists collected over 78 000 specimens during their time on the islands validating the work of charles darwin and laying the groundwork for foundational evolution texts like darwin s finches despite its significance almost nothing has been written on this voyage lost amongst discussion of darwin s trip on the beagle and the writing of david lack in collecting evolution author matthew james finally tells the story of the 1905 galapagos expedition james follows these eight young men aboard the academy to the galapagos and back and reveals
the reasons behind the groundbreaking success they had a
current fellow of the california academy of sciences james uses
his access to unpublished writings and photographs to provide
unprecedented insight into the expedition we learn the voyagers
personal stories and how for all the scientific progress that was
made just as much intense personal drama unfolded on the trip
this book shares a watershed moment in scientific history crossed
with a maritime adventure there are four tangential suicides and
controversies over credit and fame collecting evolution also
explores the personal lives and scientific context that preceded
this voyage including what brought darwin to the galapagos on
the beagle voyage seventy years earlier james discusses how
these men thought of themselves as collectors before they
thought of themselves as scientists and the implications this had
on their approach and their results in the end the voyage of the
academy proved to be crucial in the development of evolutionary
science as we know it it is the longest expedition in galapagos
history and played a critical role in cementing darwin s legacy
