How can you quickly make money at home and online with your digital 8 video camcorder, your personal computer, some software such as Photoshop and Windows XP, and perhaps your digital camera? You can develop training materials for businesses or students, prepare reports or entertainment in a home-based business online with your personal computer, calling all creative people to write and or produce digital 8 camcorder videos or still picture scrapbooks and databases with sound, video, text, and graphics in their PCs. The movie making process in Windows XP starts as you first capture home or instructional videos with your camera. People remember seven items in short-term memory so anything you create would be better off if it came in a package or database advertisement or training segment based on remembering seven items. Submit what you've developed on a Tuesday, the most productive day of the week, and present only seven items to remember in a segment.
