Although as many as 10-20% of students are affected by dyslexia, most teachers still receive very little training about this disorder. Much misinformation about dyslexia exists, and until very recently, the term dyslexia was not being used in schools. Fortunately, this is changing today. There are a variety of evidence-based tools and programs that schools can use to catch dyslexia early, develop effective interventions, and help students with dyslexia thrive in school and beyond.
