This book also provides supervision tools for other content areas such as foreign languages, fine arts, physical education, etc. Also included are tools and strategies to help you supervise teachers who use instructional strategies such as differentiated instruction, Socratic seminars, cooperative learning, and inquiry. Apply local and national standards to frame your instructional program and ensure accountability of teachers who use multiple intelligences, brain-based learning, and other innovations. The team of teachers and mathematicians who created Eureka Math believe that it’s not enough for students to know the process for solving a problem; they need to know why that process works. That’s why students who learn math with Eureka can solve real-world problems even those they have never encountered before.

The study guides are a companion to the Eureka Math program. Whether you use it online or in print, the guides collect the key components of the curriculum for each grade in a single volume. They also unpack the standards in detail so that anyone, even non-Eureka users, can benefit. The guides are particularly helpful for teachers or trainers seeking to undertake or lead a meaningful...

This practical step-by-step guide examines the stages of contemplating planning and implementing curriculum mapping initiatives that can improve student learning and create sustainable change. Do you crave peace and joy in your life? Do you want to be happy? We all desire these things, but many of us are too busy, too self-absorbed, or too imprisoned by the way we have always operated to take the steps required to change our lives and allow God’s peace and joy to flow into our everyday living. I admit that I have been guilty of settling for less than God’s best plan for my walk with Him. At one time, I actually took pride in considering myself to be someone who was in control of my life. Then God taught me a lesson about surrendering to Him and to His will. Perfect pace gives you all of the details of the powerful surrender lesson that God revealed to me during a walk with our dog Shane. The day God showed me the parallels between a walk with Shane and my walk with Him was life-changing. Since that day, I have not been able to look at either walk in the same way. Every one of us is offered the opportunity to walk with God at His perfect pace in perfect peace.

in this collection of 15 essays educators describe successful programs they
ve developed to fulfill the US national science education standards vision for the reform of teaching assessment professional development and content at the high school level. All the visions correspond with the less emphasis and more emphasis conditions that conclude each section of the standards, characterizing what most teachers and programs should do less of as well as describing the changes needed if real reform is to occur. Essay titles reveal the range of programs and creativity this book encompasses. Among the titles are technology and cooperative learning, the iit model for teaching authentic chemistry curriculum, modeling changes in traditional physics instruction guided by the standards, inquiry and assessment in two rural and urban schools, and even singing and dancing your way to science success. The book ends with a summary chapter by editor Robert Yager on successes and continuing challenges in meeting the standards visions for improving high school science. As Yager notes, the exemplary programs described in this monograph give inspiration while also providing evidence that the new directions are feasible and worth the energy and effort needed for others to implement changes.

Cowper's Catechism; a Guide for Officers and Sergeants of Volunteers ...
This book presents an ambitious model for how educators can design high quality challenging and supportive learning opportunities for English learners and other students identified to be in need of language and literacy support starting with the premise that conceptual analytic and language practices develop simultaneously as students engage in disciplinary learning. The authors argue for instruction that amplifies rather than simplifies expectations, concepts, texts, and learning tasks. The authors offer clear guidance for designing lessons and units and provide examples that demonstrate the approach in various subject areas including math, science, English, and social studies. This practical resource will guide teachers through the coherent design of tasks, lessons, and units of study that invite English learners and all students to engage in productive, meaningful, and intellectually engaging activity. This book offers the most detailed guide available for designing instruction for students categorized as ELLs. Theoretically grounded and informed by years of implementation and study, this work is without equal in the field. I recommend the book enthusiastically as required reading in all teacher preparation programs. Guadalupe Valdés, Bonnie Katz Tenenbaum, Professor of Education, Stanford Graduate School of Education, reflects its title: this book is an amplification of what it means to provide the best learning opportunities for English language learners. Drawing on classroom-based research, amplifying the curriculum offers many practical examples of intellectually engaging units and tasks. This innovative book...
